As we reflect on 2024, I want to express my deepest gratitude to everyone who has contributed to the growth and success of LUNI Lombok. Your unwavering support has allowed us to achieve more than we ever imagined.

This year, we have helped 2117 animals—an incredible milestone! Our clinic on Gili T has never been busier, leading us to hire a second vet to meet the increasing demand. Recognizing the urgent need for sterilization and basic veterinary care on Gili Air, we are now planning to establish a small clinic there. This will allow us to provide continuous sterilizations, vaccinations, parasite control, and essential treatments, helping to curb the growing cat population before it becomes unmanageable.

None of this would be possible without the dedication of our team and the generosity of our supporters. We're not stopping here!

A special thank you to those who have made a tremendous impact on our mission:

- 🐾 Animals Australia
- 🐾 Vets Without Borders
- 🐾 Our incredible donors
- 🐾 Our local team and volunteers
- 🐾 The businesses on the Gilis who support our TNR pop-up clinics
- 🐾 Everyone who supports us and uses our services

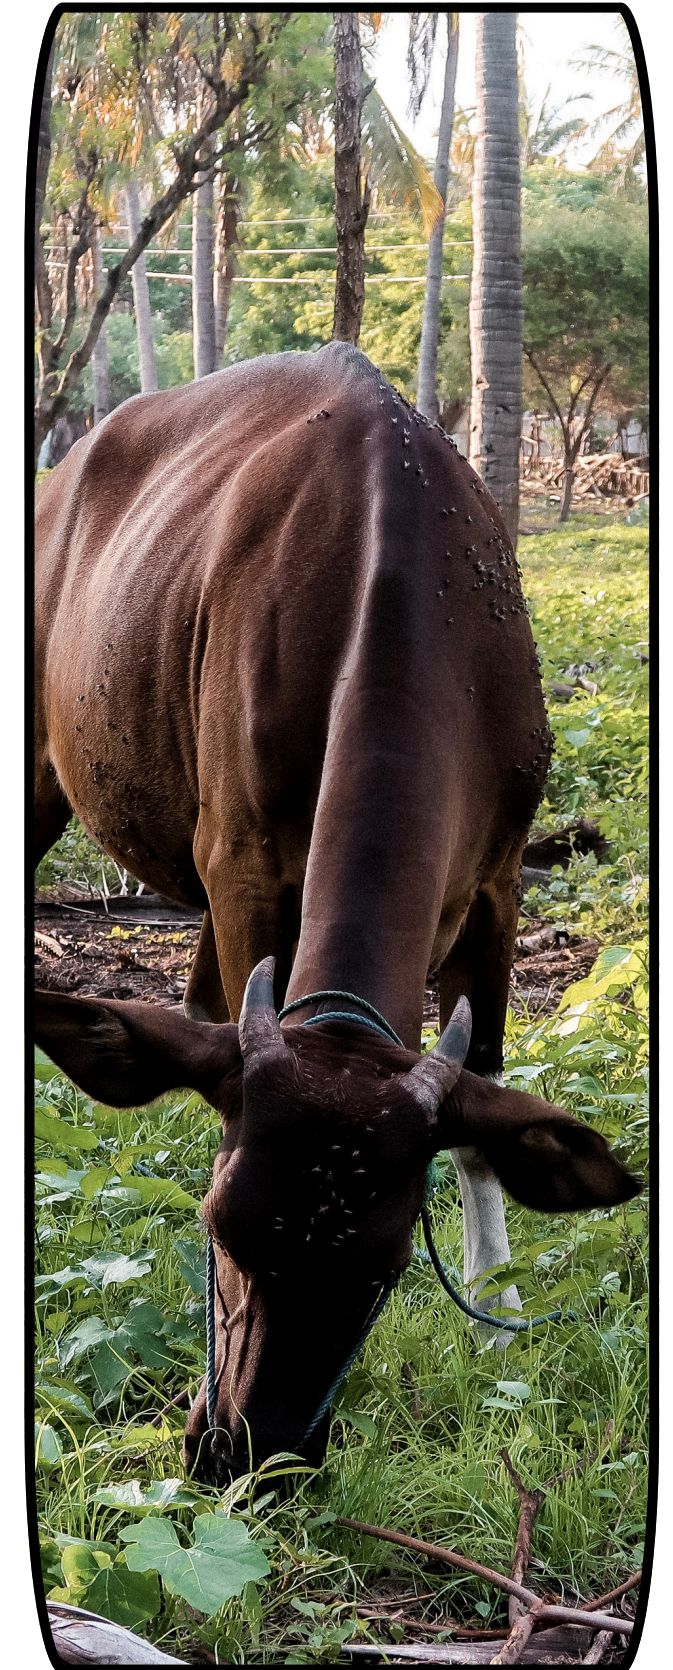

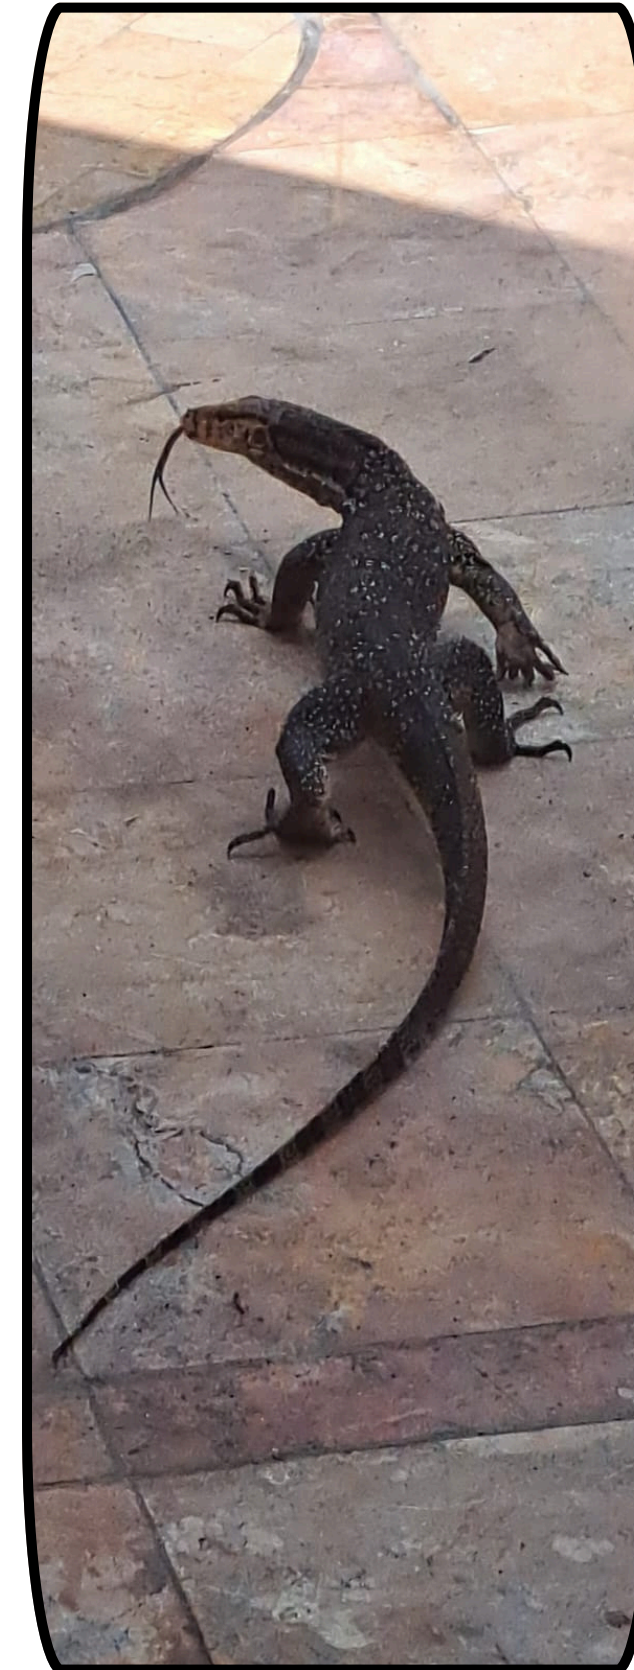

Together, we are making a lasting difference for the animals of the Gili Islands. Thank you for being part of this journey!

With gratitude,
Nina Astolfi
FOUNDER

Vision

LUNI Lombok stands for the **L**ove of **U**nwanted, **N**eglected & **I**ll-treated animals of the Gili Islands. We won't stop before all animals on the Gili Islands live a happy and healthy life as an integral part of the island community.

What we do

Helping the animals on the Gili Islands to live a better life through:

- A permanent vet clinic offering medical care and sterilisation on Gili Trawangan (free for homeless cats)
- Daily caring for more than 700 island cats (food, water, health checks)
- TNR (trap-neuter-return / sterilisation program) pop-up clinics on the Gili Islands
- Providing drinking water for other animals (cows, goats, birds, lizards, etc)
- Rescue & rehabilitation of wildlife
- Running a Cat Cafe for rescued kitties and sell cat supplies and souvenirs to raise funds

Achievements

Veterinary Care & Cat Café

Our clinic on Gili Trawangan treated 582 homeless cats, 241 local cats, and 587 pets whose owners paid full price, helping fund care for homeless cats. We have vaccinated 1141 cats against the deadly panleucopenia and cat flu virus!

Wildlife & Large Animal Care

We rehabilitated snakes, civets, musangs, wild birds, and provided veterinary care for horses, cows, goats, and rabbits. Our weekly Cowboy Check monitored and treated around 200-300 free-roaming cows.

TNR & Animal Welfare

We ran four TNR pop-up clinics—three in Gili Meno, one in Gili Air—seeing 636 animals and sterilizing 391.

Through Pussy Patrol, we provided food and water for 700+ island cats and maintained four wildlife water stations.

Non-Profit Clinic

Medical care & sterilisations

We have worked out a system which allows that ALL people can afford to treat their pets and at the same time together with us ensure the very needed medical treatment of homeless animals.

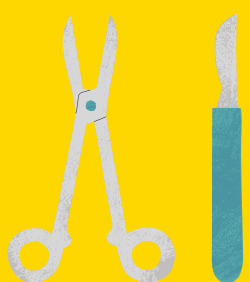

Concrete:

- 1. Those with sufficient funds and those who do not want to sterilise their cats pay regular prices.
- 2. Locals or low income owners pay as much as they are able to.
- 3. Homeless cats receive free treatment at our clinic.
- 4. Spay and neuter can always be done for free.

With this system people can help not only their cats to lead a healthy life but also directly support a homeless animal to get urgently needed treatment ❤️

Feeding & Water Stations

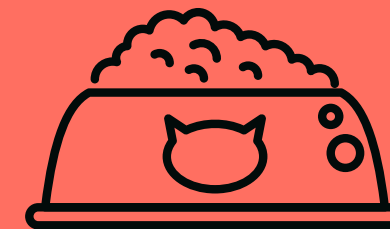

One of our main goals is to improve the welfare of island cats by providing food and fresh water - something that is rare on the island.

Our team cycles across the island every day to feed more than 700 cats in a responsible way.

We also maintain 4 special water stations for large animals and wildlife to allow them access to fresh drinking water 24 hours a day.

IDR 1,515,805,057
USD 93,000

Income

Key income sources in 2024 included the Cat Café, international donations, clinic fees from pet owners, and a TNR program grant from Animals Australia.

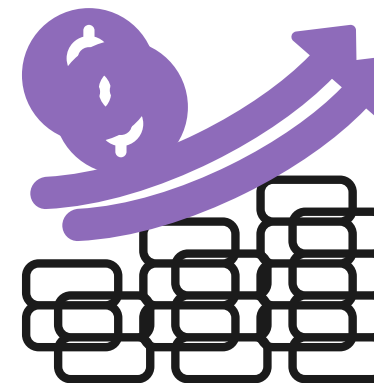

IDR 1,729,427,063
USD 106,000

Costs

The largest expenses were medical care for homeless cats, TNR and feeding of cats.

IDR -213,622,006
USD 13,121

Profit

In 2024, LUNI LOMBOK experienced a loss of over 210,000,000 IDR (13,000 USD) USD currently covered by the founder.

2024 has marked another year of remarkable growth for LUNI Lombok, but we are just getting started. We have set ambitious goals for the coming years to expand our impact even further.

1. Expanding Veterinary Services

We aim to establish a basic clinic on Gili Air to provide continuous sterilisations, vaccinations, parasite control, and essential medical treatments. This will reduce the need for animals to be transported to Gili Trawangan and ensure more consistent care for the growing cat population on Gili Air.

2. Advancing Education & Veterinary Standards

We will continue to invest in our team's education and skills, integrating a new veterinarian and offering advanced training. Our goal is to elevate our standards even further, ensuring that LUNI Lombok provides the highest quality medical care for both domestic and wild animals.

3. Increasing Sterilisation Efforts

To better control the stray cat populations, we plan to run four dedicated TNR pop-up clinics— on Gili Meno and Gili Air. Our aim is to reach at least 80% sterilisation of the island cat populations, significantly reducing overpopulation and improving overall feline health.
